Voyage Well

Everything you and your Sailors need to know to set sail

We've worked hard to create an environment where your Sailors don't have to worry about a thing — all they need to do is kick back, relax, and let the sounds of the ocean soothe. And because our sailings are only open to fully vaccinated Sailors, and we provide antigen testing free of charge at the terminal before boarding, your Sailors can voyage with complete peace of mind.

The steps to Voyage Well

The health and safety of our Sailors and Crew are our top priority, and that's why we've developed a robust set of measures in accordance with our Voyage Well Expert Advisory Group.

Before sailing:

-  **Be vaccinated.** All our sailings are open to fully vaccinated Sailors only. Sailors must be more than two weeks out from their final vaccine dose and show proof of an officially issued vaccination card in order to board the ship.
-  **Complete the health check form.** All Sailors are required to fill out the health check form, which opens up for completion in the Virgin Voyages Sailor App 24 hours prior to sailing.
-  **Get tested at the terminal.** Masks are required for the test site, terminal, and shuttle services. The testing will occur at the terminal and will be provided free of charge by Virgin Voyages, so Sailors will need to arrive one hour prior to their scheduled embarkation time to ensure time for the test. Any COVID tests taken elsewhere will not be accepted; Sailors must complete their test at the terminal on the day of their sailing.

While sailing: While on Scarlet Lady, masks are not required, but our Crew will be wearing them at all times. We'll also provide masks in cabins and on request to any Sailor who may need or want one. While off the ship at each port, we'll be following local government guidelines as it pertains to mask-wearing and we ask that our Sailors adhere to their local mandates.

We've incorporated the latest hygiene and cleaning initiatives, technology, and tools specifically for COVID. This includes touchless tech in high-touch areas, Ecolab hospital-grade, EPA-registered disinfectants, sanitizing luggage through fogging, and leveraging bi-polar ionization technology for our air purification system, which has been shown to kill **99.9%** of viruses.

For all our Shore Things and at The Beach Club at Bimini, we only suggest activities on land that meet the sanitation or physical distancing requirements that we have on the ship.

After sailing: Sailors are responsible for making their own COVID-testing plans after disembarkation from the ship if their home country necessitates a test prior to flying home.

Please note that as the circumstances around us change, our policies are subject to change as well.
